PROFILE

Customer-facing technical solutions professional with nearly four years at Google and Microsoft delivering publisher-facing advertising solutions, cloud platforms, APIs, data products, and scalable automation. Experienced in mobile app monetization, technical integrations, performance analysis, and troubleshooting across Firebase, Google Cloud, Azure, SQL, and modern full-stack systems.

EXPERIENCE

GOOGLE AdTech Solutions Engineer (Technical Solutions Consultant)

04/2025 - 07/2026 | Irvine, CA

- Led technical solution engineering for 50+ mobile app publishers, partnering with Product, Engineering, Sales, and Business Development to improve monetization, resolve integration issues, and prioritize product opportunities.
- Analyzed publisher and ad-performance data with SQL, then built TypeScript and Next.js dashboards and diagnostic tools that reduced manual QA and report turnaround time by 50%.
- Designed API and data workflows that unified publisher tracking, debugging, and opportunity identification across the AdTech stack.
- Translated platform constraints, performance signals, publisher needs, and product behavior into clear technical recommendations for customer and internal decisions.

MICROSOFT Cloud Solution Architect

08/2022 - 03/2025 | Irvine, CA

- Architected and delivered AI models, virtual agents, and custom enterprise applications across Azure, Power Platform, and Dynamics 365 for 50+ customers.
- Led technical discovery and solution-design discussions, helping customers work through ambiguous modernization decisions, architecture trade-offs, implementation, and adoption.
- Built Azure Functions and reusable workflow automation that saved approximately 10 hours of manual work each week and improved delivery consistency.

CORE STRENGTHS

Technical discovery
Solution architecture
AdTech and monetization
SQL and performance analysis
API integrations
Cross-functional delivery
Customer troubleshooting
Executive communication

TECHNOLOGY

Data
SQL, BigQuery, Python, Pandas
Cloud
Google Cloud, Azure, Firebase
Apps
TypeScript, JavaScript, React, Next.js
Platforms
AdMob, Power Platform, Dynamics 365
Other
C#, Java, Azure Functions, APIs, GenAI

EDUCATION

Georgia Institute of Technology
B.S. Computer Science
2016 - 2022 | Atlanta, GA

SELECTED PROJECTS

Knowledge Nebula
Privacy-first document graph with on-device parsing, embeddings, clustering, search, and 2D/3D exploration.
Geopolitical Simulator
Browser simulation spanning real-world economic, political, and military systems.

PROOF POINTS

50+ publishers supported
50% faster QA and reporting
50+ enterprise customers
10 hrs manual work saved weekly
